CONTRACT

Titan sliding doors

For a luxurious walk-in wardrobe or as a sleek room divider.

Titan's symmetrical curved design looks great from any angle. Choose glass both sides or a wood effect with glass on the reverse.

Technical information

Calculating doors and overlap widths.

Sliding door overlap	35mm
Door height	Opening height minus 58mm (track & wheel allowance)
Door width (for sliding doors) (not including liners)	$\frac{\text{Opening width} + (\text{number of overlaps} \times \text{overlap length})}{\text{Number of doors}}$
Stile length	Equivalent to door height
Rails & h-section lengths	Door width minus 59mm
Panel height (1 panel)	Door height minus 73mm Door height minus 75mm (Toughened glass)
Panel height (multi panel)	Panel height divided by the quantity minus 7mm for each break (12mm for toughened glass, 7mm per H-Section and 5mm gaskets)
Panel width	Finished door width minus 34mm Finished door width minus 36mm (Toughened glass)

Door construction
